How it works?

Breast Firming Process

BUST DEFINING SERUM has a high concentration of phytoestrogens. Phytoestrogens maximize blood flow and estrogen distribution throughout the breast tissues, encouraging growth and maintenance of the breast tissue, firmness and shape.

Ducts branch out from the nipple to the interior of the breast, ending in clusters of the lobules. **BUST DEFINING SERUM** stimulates the lengthening and branching out of these ducts and the development of the mammary tissue.

It also increases the fatty tissue and ligaments around the breast that provide support and shape. This results in enhanced cup size. Moreover, it helps to maintain collagen which results in giving breasts a soft, smooth and natural shape.
